# PLANET EARTH TEMPERATURE

1. While watching the film, try to add important notes to this mind map.

2. This diagram shows the seasons in the Northern Hemisphere. Copy it and label it with the help of these statements:

- June 21**      ■ Summer solstice in the northern hemisphere
- March 21**    ■ Vernal equinox. Spring in the northern hemisphere, autumn in the south.
- September 23** ■ Autumn equinox. Autumn in the northern hemisphere, spring in the south.
- December 22** ■ Winter solstice in the northern hemisphere

3. Find examples for this statement, "The seasons affect the activities we do, the foods we eat, the clothes we wear – and quite often, the moods we are in."
